

Memo/Reply From
JOSHUA LEDERBERG

TO: David Hawkins ↓

JUL - 6 1980

... just a brief note of appreciation for your review of Jensen's article in the NY Times today.

Do you recall our meeting about 25 years ago, under Ted Puck's brokerage?

I hope you might get to N.Y. more often than I can enjoy getting to Colorado. If so, please drop me a line and see what we can arrange.

Yours
Joshua

P.S.

Human genome mapping, as pioneered for Y.W. Kan with Hb^S is going to clear up the inheritance of intellectual potential far beyond what "psychometrics" ever can. I hope it will be understood that the main use of this is to establish the interrelationships that can make the genotype relatively less important.
