I'll certainly keep an eye open for  
the people you're seeking.

We (and I mean Rosenthal + Stanford)  
need to do much better than we  
have to educate + inspire the cross-  
disciplinary insights needed.

I can more readily suggest some  
names for the committees than for  
the scientific staff. Leaving aside  
the most obvious visible you  
might consider:

Lil Omen

Bill Lurance

Mike Mehlman (Mobil + Editor  
of J. Env. Path. + Tox. One of the  
harriest people in the game.  
His list of editors/adversus is  
a check list!)

Chris Walsh - MIT

Dick Wilson - Harvard

HET/Scientific Staff

I'll send a few CV's. Good luck -  
you'll need it! (But it pays  
to advertise.)

Yours,

Don
