

FORM K  
APPROVED FOR USE IN  
PURDUE UNIVERSITY  
Physics Dept.

March 2, 1955

Dear Joshua,

Do you have the following amino acid  
requiring mutants of K12 (either lysogenic or  
non-lysogenic):

methionine -  
tryptophane -  
proline -  
cystine -  
lysine -

I would like to use them in some experiments  
on protein synthesis.

I am afraid that the P<sup>32</sup> K12 experiments with  
Dave Skaar are still incomplete but I hope to  
find time to finish them soon.

With best regards,  
Alan Green
