RO

---

October 6, 1959

---

Weaver and Calvin sent me a few copies of the enclosed; they may have sent the same to you but to save time I enclose one set.

I think that this is of particular interest so as to warrant your duplicating it for SSB distribution. As you may know I will be seeing Clark Randt's group out here on Oct. 14. In passing, he reassured me that the NASA Biosciences Committee has already pressed hard for a prompt contract with Detrick.

The Institute of Biophysics (Academy of Sciences USSR) is directed by Dr. A. M. Kuzin. The NIH list shows a "Committee on... the Biology of Cosmic Flight" headed by A. D. ~~Serya~~ Seryapin. Is this all Laika-Bioastronautics, or are they the people we should try to meet with, either at Nice or at Westex-5?
