TO: Debyshire - TX
RC
RO
re A

OCT 16 1959

I had an interesting & productive session
with debyshire & the Kety committee.
I think it certainly would help them +
us to have an airing of the scientific side
of man-in-space, but if we do this
we should ask him to sit in. There
certainly are some valid objectives and
I think SSB can help to sort this out.

The Kety committee also seems to have
some pretty sound views on the role of
ecology & should be encouraged in
pushing them.
