Dear Professor Lederberg:

I enjoyed reading your article on IQ testing in the
Sunday S.F. Chronicle.

I'm enclosing an article which attempts to
deal in a rather simple way with concepts from
psychological testing and from quantitative genetics.
Although the article is intentionally quite elementary
on the genetics side, being intended primarily for
psychologists and educators with no background in their
field, it may have something of factual interest
to you.

Sincerely yours,

Arthur R. Jensen
Professor
