Dear Sir,

I read of your article on Chlorination.
Could I please have a copy of it or what
you have on the subject.

I have found there is not much
written on it and would like some
facts.

Thank you

Echel B. Dinning

** Too true! This turns out to be a very complicated
subject, and I would urge that no hasty conclusions be
drawn. The essential fact is that some very complex chemistry
and biology is involved that needs a new level of investiga-
tion. We are actively working on this now in my own laboratory

One of my students prepared a worksheet that may be of
some use to you.
