SEP 12 1985

Re: current C Com.

Just for further info.

This was one that did not
get into C/C; and so is not
in the Bibliographic file.

J

We spent some time at Stanford
trying to understand the precise
mechanism of bactericide.

To little avail. Green + Stump
(1946) is not fully persuasive on

mechanism; but with a chemical
as reactive as chlorine, proof is difficult
