Professor Joshua Lederberg
Department of Genetics
Stanford University
Palo Alto, California

Dear Professor Lederberg:

I refer to my letter of September 13, 1969. Dr. Grumbach was apparently mistaken both in the date and in the content of your article. I am now informed that your article appeared on August 31, 1969. I refer to Professor Gordon H. Ball's letter of May 12, 1967, in which he said:

"The existence of scientific papers from the Lawrence Radiation Laboratory dealing with possible damage to the population from low-level radiation such as may be produced from nuclear blasts under the Plowshare Program was determined by the Committee on University Welfare on the basis of material from that Laboratory."

Contrary to scientific procedure, Dr. Edwin MacMillan, Director of the Lawrence Radiation Laboratory of the University of California, has refused to supply copies of those papers.

I would be grateful if you would supply references to scientific papers published by the Division of Biology and Medicine of the Lawrence Radiation Laboratory dealing with the above matters. You may be aware of the fact that Dr. Arthur Tamplin is Director of the Information Section of the Division of Biology and Medicine of the Lawrence Radiation Laboratory. A telephone call to him should clear the matter up.

Sincerely,

C. D. Calsoyas
C. D. Calsoyas
