

MEMO FROM
J. LEDERBERG
GENETICS DEPARTMENT
STANFORD UNIVERSITY
STANFORD, CALIFORNIA

TO:

Myron Tribus

TX
RC
RO

JUN 12 1972

Dear Myron

I am trying to light a fire here without putting any responsibility on you for holding the matches. So I am in so sense asking ~~you~~ you to approve these remarks.

However, these pieces are necessarily put out in irresponsible haste, and if you think there may be something here that can be read differently than I really mean to say, (as did happen once before), I would be grateful to you for pointing it out.

I will be at the NIMH (496-0555) or at the Statler-Hilton Monday through Wednesday.

Sincerely,

PS "With friends like ... who needs enemies"?

Thank you for the notes on resources. Can I extract anything quotable out of all that, i.e., authority for source, or comment from you or your colleagues. (I want to contrast an authoritative view with Ehrlich et al., actually not that far apart?) It could also be an unnamed source in Doc if you prefer.
