Mr. John Sullivan
Staff Consultant
Committee on Foreign Affairs
House of Representatives
Washington, D.C., 20515

Dear Mr. Sullivan:

May I again express my appreciation to Congressman Zablocki and yourself for taking the interest you did in placing my article on biological warfare in the Congressional Record of Sept. 11.

You may already have seen the enclosed piece on SALT, which appeared in somewhat mutilated form (through noone's malice) in the Washington Post for Oct. 25. I realize it is somewhat presumptuous of me to press for a similar favor again, but I do so in the belief that you may share much of the point of view that I express therein. Obviously, I am also motivated by a desire to have my views more fully and accurately expressed on the record. Finally, I also believe it is important to communicate, both to our own administration and to the Soviets, a point of view about arms control that is by no-means softminded, but which sees the absolute necessity of finding durable and mutually reassuring agreements as a condition of global survival.

I also realize what a poor time an election recess is to bring up this suggestion; but I will be all the more appreciative for your good offices in the matter.

Yours cordially,
