

Dr. Sheldon Green

FEB -5 1988

Molecular processes in
astrocytes

Dear Dr Green -

It's a bit late in the day to be
responding to a line in your
1981 review, and perhaps better now
than late. But I hope you will
sympathize after perusing what I
enclose - and imagine what kinds
I get for it during the ensuing decade.

If you have more recent reviews,
they would be most welcome

Yours,
Joshua Lederberg

(*and should expect for an article
called "Moon dust!").
