Dear Dr. Lederberg,

You're right. I've asked our managing editor to write the Post asking for some copies of your column. I think it would be great if we ran it here.

Maybe we ought to corral you for membership in the National Association of Science Writers!!

I talked to Curt Stern today but he doesn't want to comment on Shockley publicly as he must chair a National Academy on the future of genetics and man next month. Would you send me your Post column when you write your comment on Shockley's speech?

Yours sincerely,

David Perlman
