

Memo from
JOSHUA LEDERBERG

To: Wim Rants

JUL 24 1973

"Lighthill Report

You probably have seen the story in Science, if not the original report. I do not necessarily agree with the full vehemence of Lighthill's criticisms, although some of his points are irresistible.

In any case, I thought I should pass on to you that DENDRAL came off rather well! (see encl.)

We look forward to seeing you next week.

Yours.

Josh.
