

Memo from

To:

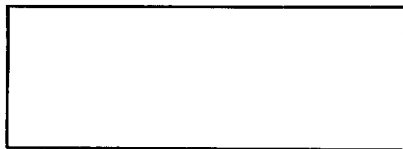

Dr H Braun

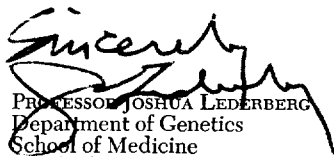

JOSHUA LEDERBERG

1975

I would like you to know that we have now programmed the general case of the rings mentioned in our correspondence. It would be prohibitive to generate all possible isomers but if you have useful constraints I think our programs may be able to help.

Have you come to the U.S.? If you are anywhere in this country we might arrange to demonstrate the programs via the computer net.

Sincerely  
  
PROFESSOR JOSHUA LEDERBERG  
Department of Genetics  
School of Medicine  
Stanford University  
Stanford, California 94305
