June 23, 1955.

Dear John,

Thanks very much for the phase variation abstract + the review of Ephussi's book. I'd appreciate it very much if you'd send me more about the former as soon as it's available.

I'm sending along a reprint of the recent PNAS paper, plus one of our growth symposium papers - by now rather out of date.

Even though I was occupied more than I thought I would be with society business (thanks to a certain individual I needn't name), I enjoyed the conference and was very glad I had a chance to talk with you and Esther.

I guess you detected a sort of  
troubled look on my face during  
the first 2 or 3 days. I'll  
have to practice putting on a  
poker face.

Rob

P.S. A check covering your  
expenses will be sent within  
a week.
