Dear Bob;

Here is a dues bill which you may pay if you want to remain a Growth Soc. member.

Along the line of shortening addresses, terms etc. I'm sending a "reprint" of a short contribution by A. S. Patterson. Apparently some of his cryptographic colleagues have a tendency to concoct new combinations of words or word fragments, and he decided to show them how it should be done. As you no doubt know "whisks" are white radiation streaks and the "Rucassera" is the Surge Precision camera. You can go on from there.

Best to Esther

P.S. That you got my previous note, i.e. that the address was in fact adequate.

Bob
