

PROPOSAL FOR
STANFORD UNIVERSITY
MEDICAL EXPERIMENTAL COMPUTING FACILITY
(SUMEX)

Submitted to the
Biotechnology Resources Branch
of the
National Institutes of Health

June 1, 1972

School of Medicine
Stanford University

TABLE OF CONTENTS

A.	INTRODUCTION	1
	1. Objectives and Long-Term Goals.....	1
	2. Background: ACME Computer Facility Experience	2
B.	SUMMARY	4
C.	JUSTIFICATION.....	6
	1. Demonstration of need.....	6
	2. SUMEX Relationship to Institutional Plans	7
D.	RESOURCE OPERATIONS	9
	1. Administrative Structure.....	9
	2. Operating Procedures and Policies	11
E.	COMPUTER CONFIGURATION RATIONALE.....	13
	1. Introduction.....	13
	2. Computing Environment.....	13
	3. Technical Requirements.....	15
	4. Configuration Topologies.....	17
	5. Hardware Selection.....	20
	a. Mainframe.....	20
	b. Peripherals, Data Channels, and Satellite Computers.....	23
	6. Implementation Plan.....	26
F.	RESOURCE PERSONNEL.....	28
G.	RESOURCE ACTIVITIES	30
	1. Services to be provided.....	30
	2. Research.....	31
	a. Core Research	31
	(1) Satellite Machine Support.....	31
	(a) Problem Statement.....	31
	(1) Limitations of standalone small computers.....	31
	(2) Attributes of large host systems.....	31
	(3) Anticipated direction of some technological innovations.....	32
	(b) Background and Rationale.....	35
	(1) Current environment for satellites in S.U. Medical Center	35
	(2) Initial Approach in Software.....	36
	(3) Incorporation of new hardware techniques.....	36
	(4) Resolution of specific goals with collaborators.....	37
	(c) Methods and Procedures.....	38
	(1) Satellite System Software Support	
	(a) Assemblers.....	38
	(b) High level language support.....	38
	(c) Realtime applications module library.....	39
	(d) Extensions to manufacturers supplied operating systems.....	40

	(2)	Computer to computer communications	41
		(a) Data transfers	41
		(b) Controlled interactions	41
	(3)	Data manipulation	42
		(a) Data collection	42
		(b) Data analysis	43
	(4)	Satellite performance, measurement and evaluation	44
	(d)	Significance of satellite machine Support.....	46
(2)		Extended Realtime Computing	47
	(a)	Problem Statement and Objectives	47
	(b)	Background	49
	(c)	Rationale	51
	(d)	Methods and Procedures	53
	(e)	Significance	58
	(f)	Collaborative Arrangement.....	58
(3)		PL/ACME on a PDP-10	62
b.		Collaborative Research and Development.....	65
	(1)	Predictive Modeling of Cardiovascular Function Utilizing X-Ray and Ultrasonic Imaging Techniques.....	65
		(a) Problem Statement.....	65
		(b) Background	66
		(c) Rationale	67
		(d) Methods and Procedures	68
		1. X-ray Image Processing	68
		2. Ultrasonic Image Processing	69
		3. Small Computer Integration	70
		(e) Significance	70
		(f) Relationships	71
	(2)	Digital Computer	74
		Processing of Cineurographic Images of the Urinary Tract	
		(a) Problem Statement	74
		(b) Background	75
		(c) Rationale	75
		(d) Methods and Procedures	76
		(e) Collaborative Affiliations	77
		(f) Significance	77
	(3)	Automated Gas Chromatography/Mass Spectrometry Analysis	78
		(a) Introduction	78
		(b) Problem Statement.....	78
		(c) Background	80
		(d) Rationale	81
		(e) Methods and Procedure	85
		(f) Significance	87
		(g) Facilities Available	87
		(h) Collaborative Arrangements	87
	(4)	Cell Separator Project	90
		(a) Background	92
		(b) Rationale	93
		(c) Methods and Procedures	94
		(d) Significance	94
		(e) Computer Interaction.....	94

(5)	Average Evoked Potentials and Perception	97
(a)	Problem Statement.....	97
(b)	Background and Rationale.....	97
(c)	Methods and Procedures	98
(d)	Significance	99
(e)	Relationship to other work.....	100
H.	BUDGET	101
1.	Detailed Budget for First 12-month Period.....	102
2.	Budget Estimates for all years of Support.....	103
3.	Explanation	105
I.	FUTURE PLANS	109
J.	APPENDICES.....	110
1.	ACME User Publications.....	111
2.	Biographical Sketches	120

FIGURES

E-1	ACME Configuration: May 1972	16
E-2	General Characteristics of the Proposed System	19
E-3	Tentative Initial Machine Configuration for SUMEX.....	22
E-4	Implementation Scheme for Remote Data Channels.....	25
E-5	Implementation Phasing Plan	27
G-1	Elements of Laboratory Instrumentation Data Systems.....	52
G-2	Proposed topology for Central Processor and Peripherals.....	54
G-3	Tentative Initial Machine Configuration for SUMEX.....	56
G-4	Software.....	57
DENDRAL-1	Realtime Mass Spectrum Interpretation System.....	83
DENDRAL-2	Processing Time Interdependence	84
Cell Separator-1	Simplified Block Diagram of Cell Separator.....	91
