Princeton University DEPARTMENT OF CHEMISTRY  
PRINCETON, NEW JERSEY 08540

19 June 1975

Professor Joshua Lederberg  
Department of Genetics  
Stanford University  
Stanford, Calif. 94305

Dear Professor Lederberg:

Enclosed is an application for SUMEX-AIM use with supporting documents. I have made the proposal reference my existing Resource grant with Langridge because that contains a fuller discussion of the project. Basically I am requesting an allocation of the SUMEX-AIM resource, support of communications costs between UC Santa Cruz including modems, and possibly support of a terminal.

I expect to reassemble my research group in Santa Cruz in August and would hope to be able to gain access at that time. This will be my only source of computing for this research.

I will be in Europe on a lecture tour from 20 June-7 July including the IUPAC meeting in Jerusalem. However messages can be left for me here at Princeton. I will then leave Princeton permanently on 23 July for the West Coast to arrive about 8 August.

I intend to apply for grants to support this work as soon as I arrive at UCSC, but it appears that between now and next year when those grants might be awarded I will be without support. A resource related grant will probably be the mechanism, providing this application is approved to provide a basis of experience.

My address after 23 July will be: Department of Chemistry  
University of California  
Santa Cruz, Calif. 95060

Best regards, I look forward to hearing from you.

Encl. Completed Questionnaire  
Proposal to SUMEX-AIM  
Parts of current grant proposals  
Reprints, supporting materials

2 copies each

Sincerely,

*W. Todd Wipke*
