Professor Joshua Lederberg
Principal Investigator
Stanford University Medical Center
Stanford, California 94305

Dear Professor Lederberg:

Thank you for your letter of 23 July. I have sent out the supporting materials as you requested. The materials were packed on the moving van and just became accessible. I have two postdoctoral students with me who will begin serious work the end of August. My GT40 made the trip ok and is operational except I don't have a modem for it.

Incidentally there is already a prospective Congen user here at UCSC working in marine natural products identification.

I look forward to beginning work in my new environment and in hearing from the committee on my proposal to SUMEX. My family and I are all very pleased with our new location and my new institution.

Sincerely,

W. Todd Wipke
Associate Professor
of Chemistry
