

January 2, 1957

Dr. J. A. Jenkins
Dept. Genetics
University of California
Berkeley 4, Calif.

Dear Dr. Jenkins:

I don't have to tell you how much Esther and I have enjoyed our visit to California. Your department's further interest in me was the icing on what was already a very delicious cake.

I could not think of any more fundamental questions than we had already gone over. Of course there are many details to be gone into if the basic matters can be handled smoothly through your administration and faculty committees.

Under separate cover, I am sending some reprints that may interest you, and I would be grateful for an exchange. The enclosure may also be of some use to you, or at least for your files.

With best wishes for the new year,

Yours sincerely,

Joshua Lederberg
Professor of Genetics
