Dear Mike -

If you meant it, I would appreciate your investigating what really happened - the enclosures can be a point of departure.

I have guessed that conflicts over relocating Genetics to Davis were a central issue.

So I am working on an autobiography, I would like to make fair and informed comment - but about institutional process, not personality.

I was not too distressed by Julian's letter of 3/13/58. It released me from my commitment to UC and allowed me to proceed with Stanford.

When will you be in N.Y.C.?

Yours,  
Joshua
