

Dear Dr. J.Lederberg!

I would greatly appreciate if you will be so kind to send me your mutant strains of Enterobacteriaceae defective in utilization of carbohydrates. In particular, I am interesting in the mutant strains defective in fermentation of all or a great number of sugars.

I ask you also to give a short genetic characteristic of these strains if you can do it. Besides that, I am interesting in the conditions for the keeping these strains.

Thank you in advance.

Sincerely yours,

 Galina Laushnik
