

Personal memo from
JOSHUA LEDERBERG

MAR 22 1988

Dr. Jerome Green
Director
Division of Research Grants
NIH

Many thanks!

to you and the NEI archivists
for the 1949 ff. papers you were
just able to send me. It is man-
ifestous they can be recovered.

I do recall having seen one or
a couple of the site visit reports; but
I did not have my own copies.

Do you know Dr. Culbertson's
whereabouts? — Dave Dade after
almost 40 years?

The 1950's project you may recall,
was virus-mediated genetic transduction.
It will be a further autobiographical
chapter.

Dr. N. D. Zinder was my grad.
res. asst. on that grant. He is of
course an esteemed professor at R.U.
(since 1957)
