

Memo/Reply From
JOSHUA LEDERBERG

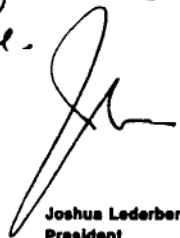

TO: DAH

Dear David

MAY 27 1984

Your talk at AAAS president's...
moved me to share the material I
just sent to Franck Press.

I have no doubt that Archim-
ides is furthering his own career
by exciting military support for
biotechnology. It may still
be possible to mobilize both
US and USSR science for a
commitment against secret
research in this area which is
the only hope of defusing a
technology race.
