

Dr. John Gibbons

FEB 24 1980

OTA.

Just barely (a board meeting I scheduled for May 5 has just been cancelled) ... I might be able to match my high interest with difficult availability of time to join your review panel.

The information material included stresses the possibilities of conflict of interest as I have had many roles in the scientific and industrial development of biotechnology. Please (and with your counsel) review this carefully.

Yours sincerely,  
John
