Dear Josh

Re: penicillin etc.

It'd be nice if Bernie wrote such a piece. Only really did find out that he'd patented the procedure.

Did he?
If I'd ever heard,
I'd try then. ①

Since your memories are your memories feel free to write as you please. One point. My memory, which may be fallible, says that before Lucia we did not plan immediate publication. To be put: my thesis.

You may be right. I'll see if I have any correspondence to clear that up. ②

Yours
Peter
Josh.

① Precisely why he should write. Also how he came to some idea. Also stumbles on phenotypic expression. First Biotek. Patent?

② Certainly a peculiar if not uncomfortable fact, if true. Indeed you might have written to Francis in despair of my ever doing anything else?
Peter
