4-3-87

A macro-pair of Cit. Chas.'s
Gene - here is the Davis/L+3
pair I told you about.

Plainsy too large to fit the
CC mold. Do you want to
break that?

Or, use it for a ~~free-to~~
"personal communication" feature
in The Scientist. If so you
should get Bernie's permission,
which I'm sure he'll give!

It is an interesting story in
several ways.
