

Personal Memo from
JOSHUA LEBERBERG

Dr J J Cargue

Emory

JUL 21 1987

Thank you for the reprint on
mutant cell lines.

As you may have noted, the title came
to my attention via your having cited
my 1950 handbook. It is gratifying
to see the pro → eu extension of these
approaches.

Davis 1948 (your ref. 12) is however
not an "abstract." You may be amused
at the reprise. He and I just wrote our
our coincidental discovery of the peni-
cillin method.

↓ P5a

Sincerely,

John Leberberg
