

September 6, 1951.

Mrs. Katherine Brehms Warren,
Biological Laboratory,
L.I. Biol. Assn.,
Cold Spring Harbor, L.I., N.Y.

Dear Kitty:

Your letter with the discussion mss. arrived a few minutes ago, and I am pleased to return them, or rather just to say that I don't think that any reply is required to any of them. I am disappointed, however, not to notice any remarks by K. H. Rothfels, now at the Botany Department at the University of Toronto. He contributed a very interesting and relevant discussion, on the question of linear order, and he had promised me that he would submit a condensation of it as a discussion for the volume. This discussion would add so much to the value of the paper that I would appreciate it very much if you could remind him about it, and urge its submission. I would do so myself now except for the possibility that you may already have it.

The trouble with our photographs is, as you must have guessed, that we took too many of them, and mostly I have had time only make contact prints from the 35mm rolls. As one might expect from IX miniature film, most of them are rather grainy upon enlargement. However, we do have likenesses of almost all of the participants and many of the other attendants, and if there are any of these that you lack yourselves, I'll do my best to make up a passable enlargement. Next time we come east, we'll bring the whole sack along, but there are rather too many to send indiscriminately.

I'm glad to hear that the work on the volume is so far along, and can certainly sympathize with you. I do hope that my own delays did not inconvenience you more than a little.

Since the discussions are carbon copies, I assumed I could keep them— but for safety's sake, they are enclosed herewith. If they are not needed, I would appreciate having them until the volume is printed.

Yours sincerely,

Joshua Lederberg.
