Department of Genetics
University of Wisconsin
Madison 6, Wisconsin
U.S.A.

Dear Josh,

I was very happy to receive your letter of January 7 and to see that things are taking shape and that we will have the pleasure of seeing you here.

I handed your letter over to François Jacob, who is running the Club this year and is making all the attending arrangements, no doubt, you will hear from him in a day or two.

I am sorry B26 was a disappointment to you, but we have not used or tested this strain since about 1952 : all this time it was sitting in a refrigerator. However, I do hope to re-test its genotype in a few weeks and will then let you know.

With kind regards to both of you from both of us,

As ever,

Boris EPHRUSSI
