NOV - 9 1982

Electric theme of AbF

Thank you for reminding me that I had written on this even before my paper in Science.

I think I tracked down what Jerome was referring to. (JCCP 1958). This was, I see, spun off the same train of thought that venturated in Science 1959.

I happen to have some reprints left, and perhaps you collect antiques

Do you have the Jerome piece at hand?

JK
