Remarks (July 24, 1968)

This report was originally prepared January 21, 1966. It is submitted as a formal report at this time to facilitate its availability to a number of workers who have requested it, and to provide an archival reference to it.

The program is now routinely run on the ACME, (IBM/360-50) time sharing system[*] at Stanford University from a source text in PL-1.

The program text appended here is a BALGOL version which includes extensive comments.

Gordon – this was hacked in JOVIAL
on the Q32 at SDC – my first
(remote) access to a timesharing system.

JM.
