Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

I wish to thank you for the time that you spent with me while I visited the University of Wisconsin. I greatly enjoyed my stay and hope that some day I will be able to return.

I very much benefited from observing some of the technics that were being used in your various laboratories. Perhaps I will be able to incorporate some of these laboratory exercises in the courses offered at Syracuse.

Sincerely yours,

Alfred T. Collette
Assistant Professor of Genetics
