

J F Crow

MAY 22 1987

Dear Jim
Perspective ---

Latest draft.

Mike Young has helped me get
up to date on Drosophila. I'd
still appreciate your looking
at that section.

Subject to your suggestions,
or a last minute phone call
from me, this can be my
definitive ms.

I'd better come to closure:
new ideas (or old ones!) keep
bubbling up, and the ms. is
probably about as long as you'd
want.

The opportunity is much
appreciated. It is hard for me
to imagine a better vehicle ever
coming up.

Can I think of offering you
another, less personal one, in
a year or two, on the genesis
of genetic engineering?

Yours,
JF
