

September 12, 1952

Dear Josh:

Thank you very much for your note on transduction in K12. It caught up with me only a little while ago in Switzerland. I have only just come back and have not yet heard what, if any, discoveries have been made here during the summer. By way of retaliation I am sending a summary of Marguerite Vogt's work and a summary which I made for for Mr. NFIP on the Raymond meeting.

Please give my regards and congratulations to Larry Morse. I think it's wonderful that he has hit on a nice discovery.

With kind regards

Max D.
