Dear Dr. Chargaff:

I am very anxious to complete the program of the symposium on "Nucleic Acids and Nucleoproteins" as soon as possible, and so will appreciate it if you can send me the title of your paper soon.

Dr. Stacey will not be able to attend the symposium, and therefore I expect that you will be the only speaker on the topic of bacterial nucleoproteins. Dr. Michael A. Peshkov, of Moscow, U.S.S.R., was invited to speak in this section, but I have not had a reply from him and do not expect an acceptance.

Sincerely yours,

M. Demerec

MD:af

P.S. I am enclosing a copy of the "Notice to Contributors," which gives information about the preparation of manuscripts for the symposium volume.
