Madison 6, Wisconsin
U. S. A.

Dear Dr. Lederberg:

Thanks for your letter and the information it contains.
If we have to estimate lactase in the future we will
certainly use your method.

We have been interested for a time in the direct
fermentation of lactose. I wish we had a mutant similar
to the one which allowed such a beautiful solution of the
maltose problem.

I am sending you our reprints under separate cover.
We are still working on galactose fermentation and are
greatly interested in your mutants which appear to provide
such a powerful tool for this kind of studies.

Yours sincerely,

Luis F. Leloir.

P.S. Please place our name in your mailing list.
