Dear Ed:

We found the P1 lysate waiting here upon our return. Thanks very much. Could I ask you also for your recipes, and for a sub. of the Shiga indicator?

I don't know if this will find you at Urbana or at ~~Frank~~ CSH; if the latter, I hope you have occasion to meet Dr. Morton (in the phage course) who will be doing some of the work with P1-transduction.

Sincerely,

Joshua Lederberg
