

THE WORCESTER FOUNDATION FOR EXPERIMENTAL BIOLOGY

Shrewsbury, Massachusetts  
12-17-56

Dear Josh,  
Many thanks for the set of reprints you sent me; they are of such recent date that only one was already in my possession. Although my present work (active transport and steroid function in microorganisms) is not immediately concerned with genetic problems, I can already foresee the application of the techniques and concepts of genetics. - This may be a most subjective prejudice. - So, please keep me on your mailing list.

Sincerely  
Gabe Lester
