

August 15, 1950.

Professor L. C. Dunn,
Department of Zoology,
Columbia University,
New York 27, N. Y.

Dear Doctor Dunn:

Enclosed herewith is an abstract of my forthcoming contribution to "Genetics in the 20th Century". I regret that I do not have the leisure and facilities here to prepare the written manuscript, and that I shall have to defer working on it until I return to Madison after the Jubilee meetings. I hope to have the manuscript ready not later than the middle of October. However, I would appreciate learning of your definite requirements in this respect in order to change this date in either direction as may be necessary or permissible.

Yours sincerely,

Joshua Lederberg,
Associate Professor of Genetics,
UNIVERSITY OF WISCONSIN.

P.S. Thank you for your note concerning the reference to bacterial recombination in your textbook.

JL
