Professor Joshua Lederberg
Department of Genetics
College of Agriculture
University of Wisconsin
Madison 6, Wisconsin

Dear Professor Lederberg:

I have referred your request for information on the use of polymers for containers in bacteriological work to Dr. J. E. Teagarden of our Polychemicals Department and you should hear from him shortly concerning his suggestions regarding your problem.

Dr. deFiebre who received his Ph.D. degree in bacteriology with Professors Knight and Wilson of the University of Wisconsin joined our staff on the first of July and we now have underway some research in microbiology. I plan to visit the University of Wisconsin again early in 1953 and hope that it will be possible to visit with you at that time and discuss in somewhat greater detail our plans with regard to this research.

Sincerely,

Chas. W. Todd
