Dr. Joshua Lederberg  
Department of Genetics  
The University of Wisconsin  
Madison 6, Wisconsin

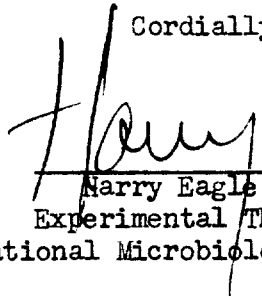

Dear Josh:

I hasten to reply to your letter of January 19th. You do me too much honor in indicating that I am in charge of the Symposium on Growth Inhibition and Chemotherapy. I merely suggested some names to Dr. Chain, for his consideration.

I very much hope you will appear on the program. Dr. Cavalli has already been invited by Dr. Chain; and whether you give separate papers, or a joint paper, is something you can work out with Cavalli. Dr. Chain would probably be agreeable to either alternative. My own suggestion would be that you present separate paper; and if you find it impossible to attend, Cavalli could perhaps read your paper.

Bernie Davis is going to give a paper in the Symposium on Microbial Metabolism, and for that reason will not be on this one. Ernest Jawetz will be asked to discuss antagonism and synergism; and Herbert Morgan will be asked to discuss bacterial and virus inhibition by metabolite antagonists. There will also be a paper on the chemistry of the newer antibiotics. Of the European workers, Chain is asking Cavalli, Albert, Macheboeuf, Hawking, and Work. Needless to say, I trust you will consider these names in confidence.

Cordially,
