Sept. 7. 1955

Dr. Joshua Lederberg,  
Dept. of Genetics,  
Univ. of Wisconsin,  
Madison, Wisconsin.

Dear Dr. Lederberg:

I would greatly appreciate it, if you could send cultures of *E. coli* K-12 and a "lactose-negative" mutant of K-12. We are hoping to use these organisms to study the relationship of DNA to enzyme formation in cell free systems.

Thanking you for your kindness.

Very sincerely yours,  
Kaney Ebisuzaki.
