Dr. J. LEDERBERG
Dept. of Genetics
University of Wisconsin
MADISON 6 (Wis.)
U.S.A.

Dear Dr. Lederberg,

I have sent strains WR168 and WR243. Strain WR168 was derived in several steps from your strain W1177; it is resistant to most of the antibiotic strains but partially susceptible to those producing colicins G, H, S1 and S4. Strain WR243 was derived from your strain 58.161 and is resistant to every colicin.

I should be very glad to receive a set of reprints from your work on bacterial genetic, specially those published in "Genetics" and "Proc. nat. Acad. Sci." which are journals not available here in Liege.

I am very sincerely yours

Dr. P. Fredericq
