HALIFAX, N.S.

1 September 1952

Dear Josh,

I thought that reference was in the Revue Canadienne de Biologie for 1949, but the only one I've got is: Case, R.A. 1949. J. Pathol. & Bacteriol. 61(1):124-27. "A suggested explanation of the alleged phenomenon of symbiotic (bacterial) Nitrogen-fixation in whales"

For your collection I include also:

Kadota, H. (date, periodical and volume in Japanese, but 1 page abstract in English: possibly in Mem. Coll. Agric. (Kyoto Univ.) for 1951). ? :59-62.

"Studies on the agar-decomposing enzyme of *Vibrio parvulus* (On the general character of the enzyme)"

and :

Muromtsev, S.N. 1949. Annali d'Igiene 12:379-84.

"Il problema della ibridizzazione vegetativa in microbiologia"

We were delighted to have your company, and look forward to another visit, perhaps next year. I hope the rest of the trip went off well.

Yours,
