

*Alan*

August 20, 1956

Dear Alan:

Of course we are disappointed, but we defer to your own judgment about 'the experiment'. I would like to have some sort of try at it, but have not yet gone into detail with Walter about it.

Why don't you come up and pay us a visit anyhow? Anytime now will be convenient.

We've been back from Woods Hole about two weeks, but my desk is first clear and I can enjoy the lab again.

Yours,

P.S. I wish you & Dave would do an experiment to look for DNA transfer in F-duction. Or have you?
