Dr. J. Lederberg,  
University of Wisconsin  
Madison, Wis.

Dear Dr. Lederberg, I am interested in attempting transduction & recombination experiments on the pathogenic varieties of *E. coli*, and I should be most grateful for any reprints of your articles which are still available. I wonder if you could also give me some information about a "microbial genetics Bulletin" which is published in America. I am just going back to Australia after a visit to England, where I talked with Drs. W. Hayes, Rowley & Stocker on this subject.

Yours sincerely,

(Dr) A. R. Gannew

(Bacteriologist)
