

January 16, 1951.

Dr. J. S. Gots,
Dept. of Bacteriology,
University of Pennsylvania,
Philadelphia 4, Pa.

Dear Dr. Gots:

In reply to yours of the 9th, I am afraid that I have only one or two tryptophaneless mutants in K-12, on hand, both of which have responded to indole, but whose general behavior has been rather irreproducible.

May I suggest that you communicate with the following people, each of whom has, I believe, picked up a few such mutants in K-12:

B. D. Davis 411 E. 69 St., New York.
Dan Harris Dept. Zoology, U. of Chicago
E. L. Tatum Biology Stanford
E. M. Bonner Botany Yale.

I am sorry to be unable to be of greater assistance.

Sincerely yours,

Joshua Lederberg,
Associate Professor of Genetics.
