

Marine Biological Laboratory,
Woods Hole, Mass.

3 June 1955

Dear Joshua,

We arrived here a couple of days ago, having had a leisurely and uneventful trip south. The present plot is still far from organized, but we can at least assure you and Esther of accommodation if you do manage to come to Woods Hole — as we very much hope you will.

I doubt if we will be at Ambest, but one never knows.

The Lamont people at Columbia University are still our hopefulest bet

2.

for next year — but so far nothing is settled. However, as I think Gifford Pinchot will be leaving Yale this summer, he will probably be as anxious as we are to have a definite location for next year. (I forget whether I mentioned this business to you — it's a scheme for the development of marine microbiology, under a hoped-for Rockefeller grant.)

Congratulations on your new home! I hope you have it now in good shape for living in. We may be able to take you up on your invitation some day!

Best wishes —

Ralph.
